Vehicle To Victory

It is a fact that there is no one on this planet who has not felt or been victimized at one point or another. However, there are different degrees to which one has been victimized. No matter, each time a person is hurt or harmed, it leaves a scar and wound that must be addressed. It takes our full attention, patience and determination. To leave a problem too quickly is to ensure its return.

Emotional and spiritual injuries are no different than physical wounds. They need to be cleansed and tended. However, a physical wound requires medical attention from outside ourselves, whereas an emotional or spiritual wound must be healed from inside ourselves.

The purpose of this guide is to take us on a journey of self-discovery and self-healing. The road may be bumpy and detours may have to be taken, but in the end, we can indeed reach the destined place we set out to travel to.

What is victory? Victory is the feeling of empowerment. Someone who is empowered believes that good can win over evil. It is someone who embraces truth and rejects lies. It is someone who is willing to stand up for fairness and justice for themselves and others. It is someone who fights back and says; I am NOT what happened to me, I am someone who survived what happened to me...and I did not just survive, I thrived.

Within each one of us, there is a hidden strength that can transmute a horrific situation and build a wonder-filled life. Look at holocaust survivors, who lost their whole families, nearly died themselves and yet went to a new country and created good lives for themselves and others. Nelson Mandela, Mahatma Gandhi and so many more who were imprisoned, beaten and starved, and yet came out stronger than ever to meet their honorable, incredible destiny with a force to be reckoned with.

Though we cannot change the past, we can change the present, which holds the potential of a totally different future.

May the road to recovery be an inspired, exciting and determined one. No brakes... pedal to the metal!
